

The puncture

Punctures rarely happen, when you get one it's always at the most inopportune moment!!

Some Alternatives for Punctures

- 1.0 **You could call for roadside assistance**, (assuming you have network coverage) and once the service eventually gets to your location the problem is resolved.
 - 2.0 **You could change to your spare tyre** (assuming your spare has air in it and you can get the wheel nuts undone) not an option for bikes. Half an hour plus it is dirty and unpleasant. The side of the road is an extremely dangerous place to be.
 - 3.0 **You could use a can of pressurised sealant** if you have one, but they are unreliable, dirty, plus they make it more difficult for professionals to fix the tyre later. In general aerosoles are flammable and users are not aware of the health and safety risks.
 - 4.0 **Now you can use Cargol Turn & Go** Emergency Tyre Repair kit to easily fix your punctures with no tools, no skills and no mess in under five minutes!
- n.b Please remember you should not exceed 80kph/50mph with an emergency tyre repair, and have your tyre inspected by a tyre professional as soon as practical.

Cargol Turn&Go

It is just so simple to use,
CARGOL does not require special skills or knowledge.
You do not need to be strong or particularly dexterous.
No additional tools are required,
Everything you need is in the kit.

The one piece of equipment every motorist needs.

Get piece of mind, and get your CARGOL Turn & GO kit today!
